The way we work together and live together is changing rapidly; in whichever sector we are active. As a result of digitization, robotisation and globalization, value propositions of companies, organizations and also those of higher educated individuals are shifting. The research group Sustainable Talent Development examines how the learning/working environment of higher educated people is changing from the start of their education until they say goodbye to the professional practice.

How does their way of working change, which 21st century skills are being called upon, and what does that mean for education? Lifelong learning is becoming increasingly important, but how do we use that principle innovatively and effectively? Furthermore, if existing occupations change rapidly or even disappear and new occupations emerge: how can education be future-proof? We are conducting research into this as well. Across THUAS, but also outside this university.

Several studies have now been combined in the book 'Inspired to change: a kaleidoscope of transitions in higher education'. Each member of the research group, in some cases with others, has written a chapter about his/her insights and experiences in the field of educational innovation and talent development of students, teachers and other professionals.

We would like to invite you for the official book launch on 30th May. During this launch we wish to inspire you, you will meet the authors and discuss the future of education.

Program

14.30 Doors open
15.00 Opening by Simone Fredriksz, Faculty Director Business, Finance & Marketing
15.05 Introduction of the book by Ellen Sjoer, head of the research group Sustainable Talent Development/leading lector research platform Connected Learning
15.20 ‘Elements in the environment that make educational innovation feasible’ by Lonneke Frie, Member of the research group Sustainable Talent Development/Senior Lecturer Human Resource Management program
15.30 Debate ‘Why do educational innovations succeed or fail?’
16.05 Presentation of the book’s first copy
16.15 Evaluation while enjoying a snack & drink

Afterwards, each participant receives a copy of the book.

You can sign up via this link. Please contact Merel Hillen if you have any questions.

We are looking forward to seeing you on 30th May!

Kind regards,
Research group Sustainable Talent Development
